June 15 Deadline for 2016 Acreage Reporting

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

The following acreage reporting dates are applicable for Colorado:

- January 15: Apples, Grapes, Peaches
- June 15, 2016: Onions and Shallots
- July 15, 2016: All other Crops and CRP
- November 15: Apiculture, PRF/Perennial Forage, Fall Seeded Small Grains

The following exceptions apply to the above acreage reporting dates:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of "cover only", "green manure," "left standing," or "seed," then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15

USDA Extends Deadline for Recording Farm Structure - to July 1

Gives Non-Family Farming Operations More Time to Restructure in Response to 'Actively Engaged' Farm Management Rule

USDA announced a one-time, 30-day extension to the June 1 deadline for recording farm organization structures related to Actively Engaged in Farming determinations. This date is used to determine the level of interest an individual holds in a legal entity for the applicable program year. Farming operations will now have until July 1 to complete their restructuring or finalize any operational change. The U.S. Department of Agriculture (USDA) issued the extension in response to farmers and ranchers who requested more time to comply, and to assure that everyone has enough time to provide their information under the new rules.

The 2014 Farm Bill provided the Secretary with the direction and authority to amend the Actively Engaged in Farming rules related to management. The final rule established limits on the number of individuals who can qualify as actively engaged using only management. Only one payment limit for management is allowed under the rule, with the ability to request up to two additional qualifying managers operations for large and complex operations.

The rule does not apply to farming operations comprised entirely of family members. The rule also does not change the existing regulations related to contributions of land, capital, equipment or labor, or the existing regulations related to landowners with a risk in the crop or to spouses. Producers that planted fall crops have until the 2017 crop year to comply with the new rules. The payment limit associated with Farm Service Agency farm payments is generally limited annually to \$125,000 per individual or entity.

USDA Unveils New Improvement to Streamline Crop Reporting

Update Lets Farmers and Ranchers Report Common Acreage Information Once

Farmers and Ranchers filing crop acreage reports with the Farm Service Agency (FSA) and participating insurance providers approved by the Risk Management Agency (RMA) now can provide the common information from their acreage reports at one office and the information will be electronically shared with the other location.

This new process is part of the USDA Acreage Crop Reporting Streamlining Initiative (ACRSI). This interagency collaboration also includes participating private crop insurance agents and insurance companies, all working to streamline the information collected from farmers and ranchers who participate in USDA programs.

Once filing at one location, data that's important to both FSA and RMA will be securely and electronically shared with the other location avoiding redundant and duplicative reporting, as well as saving farmers and ranchers time.

Since 2009, USDA has been working to streamline the crop reporting process for agricultural producers who have expressed concerns with providing the same basic common information for multiple locations. In 2013, USDA consolidated the deadlines to 15 dates for submitting these reports, down from the previous 54 dates at RMA and 17 dates for FSA. USDA representatives believe farmers and ranchers will experience a notable improvement in the coming weeks as they approach the peak season for crop reporting later this summer.

More than 93 percent of all annual reported acres to FSA and RMA now are eligible for the common data reporting, and USDA is exploring adding more crops. Producers must still visit both locations to validate and sign acreage reports, complete maps or provide program-specific information. The common data from the first-filed acreage report will now be

available to pre-populate and accelerate completion of the second report. Plans are underway at USDA to continue building upon the framework with additional efficiencies at a future date.

Farmers and ranchers are also reminded that they can now access their FSA farm information from the convenience of their home computer. Producers can see field boundaries, images of the farm, conservation status, operator and owner information and much more.

The new customer self-service portal, known as **FSAFarm+**, gives farmers and ranchers online access to securely view, print or export their personal farm data. To enroll in the online service, producers are encouraged to contact their local FSA office for details. To find a local FSA office in your area, visit <http://offices.usda.gov>.

USDA Announces Conservation Reserve Program Results

More Than 800,000 Acres Selected Through Highly Competitive Application Rounds

USDA announced the enrollment of more than 800,000 acres in the Conservation Reserve Program (CRP). Through CRP, the U.S. Department of Agriculture (USDA) helps farmers offset the costs of restoring, enhancing and protecting certain grasses, shrubs and trees that improve water quality, prevent soil erosion and strengthen wildlife habitat. Farmers' and ranchers' participation in CRP continues to provide numerous benefits to our nation, including helping reduce emissions of harmful greenhouse gases and providing resiliency to future weather changes.

A nationwide acreage limit was established for this program in the 2014 Farm Bill, capping the total number of acres that may be enrolled at 24 million for fiscal years 2017 and 2018. At the same time, USDA has experienced a record demand from farmers and ranchers interested in participating in the voluntary program. As of March 2016, 23.8 million acres were enrolled in CRP, with 1.7 million acres set to expire this fall.

Over three million acres have been offered for enrollment this year across the three main categories within CRP, with USDA's Farm Service Agency (FSA) receiving over 26,000 offers to enroll more than 1.8 million acres during the general enrollment period, and over 4,600 offers to enroll more than one million acres in the new CRP Grasslands program. Coming off a record-setting 2015 continuous enrollment of over 860,000 acres, more than 364,000 acres already have been accepted for 2016 in the CRP continuous enrollment, triple the pace of last year.

FSA will accept 411,000 acres in general enrollment, the most competitive selection in the history of the program, with the acreage providing record high conservation benefits. USDA selected offers by weighing environmental factors plus cost, including wildlife enhancement, water quality, soil erosion, enduring benefits, and air quality.

The results of the first-ever enrollment period for CRP Grasslands, FSA will also accept 101,000 acres in the program, providing participants with financial assistance for establishing approved grasses, trees and shrubs on pasture and rangeland that can continue to be grazed. More than 70 percent of these acres are diverse native grasslands under threat of conversion, and more than 97 percent of the acres have a new, veteran or underserved farmer or rancher as a primary producer. FSA continues to accept CRP Grasslands offers and will conduct another ranking period later this year.

Colorado had 47,255 acres accepted in general enrollment (Sign-Up 49) and 14,589 acres accepted in the 1st enrollment period for CRP Grasslands.

Participants in CRP establish long-term, resource-conserving plant species, such as approved grasses or trees (known as "covers") to control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

To learn more about FSA's conservation programs, visit www.fsa.usda.gov/conservation or contact a local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

USDA Expands Safety-Net for Dairy Operations Adding Next-Generation Family Members

Dairy farms participating in the Margin Protection Program (MPP) can now update their production history when an eligible family member joins the operation. The voluntary program, established by the 2014 Farm Bill, protects participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below levels of protection selected by the applicant.

The U.S. Department of Agriculture's (USDA) Farm Service Agency (FSA) published a final rule which makes these changes effective on April 13, 2016. Any dairy operation already enrolled in the Margin Protection Program that had an intergenerational transfer occur will have an opportunity to increase the dairy operations production history during the 2017 registration and annual coverage election period. The next election period begins on July 1, 2016, and ends on Sept. 30, 2016. For intergenerational transfers occurring on or after July 1, 2016, notification must be made to the FSA within 60 days of purchasing the additional cows. Each participating dairy operation is authorized one intergenerational transfer at any time of its choosing until 2018.

For \$100 a year, dairy producers can receive basic catastrophic protection that covers 90 percent of milk production at a \$4 margin coverage level. For additional premiums, operations can protect 25 to 90 percent of production history with margin coverage levels from \$4.50 to \$8, in 50 cent increments. Annual enrollment in the program is required in order to receive margin protection. The final rule also provides improved risk protection for dairy farmers that pay premiums to buy-up higher levels of coverage by clarifying that 90 percent of production is covered below the \$4 level even if a lower percentage was selected above the \$4 margin.

Earlier this year, FSA gave producers the opportunity to pay their premium through additional options including via their milk cooperative or handler. This rule facilitates those options and also clarifies that the catastrophic level protection at \$4 will always cover 90 percent of the production history, even if a producer selected a less than a 90 percent percentage for the buy-up coverage.

Assuming current participation, had the Margin Protection Program existed from 2009 to 2014, premiums and fees would have totaled \$500 million while providing producers with \$2.5 billion in financial assistance, nearly \$1 billion more than provided by the old Milk Income Loss Contract program during the same period.

For more information, visit FSA online at www.fsa.usda.gov/dairy or stop by a local FSA office and ask about the Margin Protection Program. To find a local FSA office in your area, visit <http://offices.usda.gov>.

Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement and some loans between \$50,000 and \$100,000 will no longer require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

USDA Expands Microloans to Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program, which celebrates its third anniversary this week, has been hugely successful, providing more than 16,800 low-interest loans, totaling over \$373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

This microloan announcement is another USDA resource for America's farmers and ranchers to utilize, especially as [new and beginning farmers and ranchers](#) look for the assistance they need to get started. To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office. To find your nearest office location, please visit <http://offices.usda.gov>.

Farmers to Receive Documentation of USDA Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

The 2014 Farm Bill requires a customer receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity. Electronic receipts for acreage reports will begin on August 1, 2016.

A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

USDA's Building Blocks for Climate Smart Agriculture & Forestry

The U.S. Department of Agriculture announced a comprehensive and detailed approach to support farmers, ranchers, and forest land owners in their response to address the causes of climate change in April 2015. The framework consists of 10 building blocks that span a range of technologies and practices to reduce greenhouse gas emissions, increase carbon storage, and generate clean renewable energy through mitigation.

USDA's strategy focuses on climate-smart practices designed for working production systems that provide multiple economic and environmental benefits in addition to supporting resilience to extreme weather, reduced emissions and increased carbon storage.

Through this comprehensive set of voluntary programs and initiatives spanning its programs, USDA expects to reduce net emissions and enhance carbon sequestration by over **120 million metric tons** of CO₂ equivalent (MMTCO_{2e}) per year – about 2% of economy-wide net greenhouse emissions – by 2025. That's the equivalent of taking **25 million cars** off the road, or offsetting the emissions produced by powering nearly **11 million homes** last year.

For more information on the Building Blocks for Climate Smart Agriculture and Forestry click the following link: <http://www.usda.gov/documents/climate-smart-fact-sheet.pdf> . For additional information on ways to consider greenhouse

gases when managing land, refer to the USDA Climate Hub webpage: <http://www.climatehubs.oce.usda.gov/>.

Important Dates to Remember and Interest Rate for June

Important FSA Dates to Remember:

- **June 15** 2016 Acreage Reporting/Crop Certification Deadline for Onions and Shallots
- **July 15:** 2016 Acreage Reporting/Crop Certification Deadline **for** CRP and all other crops not required to be reported by previously announced deadlines. Please contact your County Office if you have questions on a specific crop.
- **July 15:** Final 2015 NAP Final Production Reports are due for certain NAP crops
- **July 15:** The nomination period begins for County Committee Elections across Colorado.
- **July 16:** CRP 2016 Summer/Fall Managed Harvesting and Routine Grazing Begins (with prior County Committee Approval of Request)
- **Aug. 1:** Deadline for 2016 ARC and PLC Enrollment
- **Aug. 1:** Deadline to request farm transfers for FY' 2016
- **Aug. 1:** Last day to file nomination forms at the local USDA Service center
- **Nov. 15** Deadline to report Apiculture, PRF/Perennial Forage, Fall-Seeded Small Grain Acreage

For more information about FSA programs, contact your local FSA office.

Ongoing Notice of Loss Requirements:

- **NAP:** Submit Notice of Loss within 15 calendar days of the earlier of a natural disaster occurrence, the final planting date if planting is prevented by a natural disaster, the date that damage to the crop or loss of production becomes apparent; the normal harvest date.
- **ELAP:** Submit Notice of Loss the earlier of 30 calendar days of when the loss is apparent or Nov. 1st after the end of the program year in which the loss occurred.
- **Livestock Indemnity Program (LIP):** Submit Notice of Loss within 30 calendar days of when the loss is apparent

May FSA Interest Rate:

- Farm Operating: 2.25%
- Microloan Operating: 2.375%
- Farm Ownership: 3.5%
- Farm Ownership - Joint Financing: 2.50%
- Farm Ownership - Down Payment: 1.50%
- Emergency - Actual Loss: 3.25%
- Farm Storage Facility Loan 7 year term: 1.625%
- Farm Storage Facility Loan 10 year term: 1.75%
- Farm Storage Facility Loan 12 year term: 1.875%
- Commodity Loan: 1.625%
