Thinking Safety...

Flowing grain in a storage bin or gravity-flow wagon is like quicksand — it can kill quickly. It takes less than five seconds for a person caught in flowing grain to be trapped.

The mechanical operation of grain handling equipment also presents a real danger. Augers, power take offs, and other moving parts can grab people or clothing.

These hazards, along with pinch points and missing shields, are dangerous enough for adults; not to mention children. It is always advisable to keep children a safe distance from operating farm equipment. Always use extra caution when backing or maneuvering farm machinery. Ensure everyone is visibly clear and accounted for before machinery is engaged.

FSA wants all farmers to have a productive crop year and that begins with putting safety first.

Office Hours

Monday - Friday

8:00am - 4:30pm

USDA's Farm Service Agency (FSA) announced that the deadline to enroll for the dairy Margin Protection Program for coverage in 2016 has been extended until Nov. 20, 2015. The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating farmers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the farmer.

Producers are encouraged to use the online Web resource at www.fsa.usda.gov/mpptool to calculate the best levels of coverage for their dairy operation. The secure website can be accessed via computer, smartphone or tablet.

Producers who were enrolled in 2015 will need to make a coverage election for 2016 and pay the \$100 administration fee. Although any unpaid premium balances for 2015 must be paid in full by the enrollment deadline to remain eligible for higher coverage levels in 2016, premiums for 2016 are not due until Sept. 1, 2016. Also, producers can work with milk marketing companies to remit premiums on their behalf.

To enroll in the Margin Protection Program for Dairy, contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

Payments under the program may be reduced by a certain percentage due to a sequester order required by Congress and issued pursuant to the Balanced Budget and Emergency Deficit Control Act of 1985. Should a payment reduction be necessary, FSA will reduce the payment by the required amount.

Breaking Ground

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production purposes as doing so without prior authorization may put a producer's federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils are required to apply tillage, crop residue and rotational requirements as specified in their conservation plan.

Producers should notify FSA as a first point of contact prior to conducting land clearing or drainage type projects to ensure the proposed actions meet compliance criteria such as clearing any trees to create new cropland, then these areas will need to be reviewed to ensure such work will not risk your

County Office Staff: eligibility for benefits.

FSFL..Is It Right For You...

Farm Storage Facility Loans Adds More Eligible Commodities

New Provisions Increase On-Farm Storage for Dairy, Flowers, Meats

FSA's Farm Storage Facility Loan (FSFL) program, which provides low-interest financing to producers to build or upgrade storage facilities, will now include dairy, flowers and meats as eligible commodities.

For 15 years, the FSFL program has provided affordable financing, allowing American farmers and ranchers to construct or expand storage on the farm and by adding eligible commodities; these low-interest loans will help even more family farmers and ranchers to expand on-site storage.

The new commodities eligible for facility loans include floriculture, hops, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Commodities already eligible for the loans include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, and fruits, nuts and vegetables for cold storage facilities.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

USDA Commits \$2.5 Million to Expand New Farmer Education

Training Will Help Returning Service Members, Underserved, and Urban Producers

U.S. Department of Agriculture (USDA has announced that \$2.5 million in grants is now available for projects to educate new and underserved farmers about more than 20 Farm Service Agency (FSA) programs that can provide financial, disaster or technical assistance to the agricultural community.

The grants will be awarded to nonprofits and public higher education institutions that develop proposals to improve farmer education on topics such as financial training, value-added production, recordkeeping, property inheritance, and crop production practices.

USDA will conduct four evaluation periods to review applications, with the deadlines of Nov. 20, 2015, Jan. 22, 2015, Mar. 18, 2016, and May 27, 2016. Awards between \$20,000 and \$100,000 per applicant will be available. To learn more about the funding solicitation and the related Farm Service Agency programs, details can be found at www.grants.gov with the reference number USDA-FSA-CA-2015-001. For nonprofits and public institutions of higher education that are considering participation, an online informational session will be conducted on Sept. 28, 2015. Additional information is posted on the Web at www.fsa.usda.gov/outreach.

Did You Know?

Dairy Indemnity Payment Program

The 2014 Farm Bill authorized the extension of the Dairy Indemnity Payment Program (DIPP) through September 30, 2018. DIPP provides payments to dairy producers and manufacturers of dairy products when they are directed to remove their raw milk or products from the market because of contamination.

Save Time – Make an Appointment with FSA

To insure maximum use of your time and to insure that you are afforded our full attention to your important business needs, please call our office ahead of your visit to set an appointment and to discuss any records or documentation that you may need to have with you when you arrive for your appointment. For local FSA Service Center contact information, please visit: <http://offices.sc.egov.usda.gov/locator/app>.

Maintaining the Quality of Farm-Stored Loan Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer's name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

Foreign Buyers Notification

The Agricultural Foreign Investment Disclosure Act (AFIDA) requires all foreign owners of U.S. agricultural land to report their holdings to the Secretary of Agriculture. The Farm Service Agency administers this program for USDA.

All individuals who are not U.S. citizens, and have purchased or sold agricultural land in the county are required to report the transaction to FSA with 90 days of the closing. Failure to submit the AFIDA form (FSA-153) could result in civil penalties of up to 25 percent of the fair market value of

the property. County government offices, Realtors, attorneys and others involved in real estate transactions are reminded to notify foreign investors of these reporting requirements.

The Organic Option

Reporting Organic Crops

Producers who want to use the Noninsured Crop Disaster Assistance Program (NAP) organic price and selected the "organic" option on their NAP application must report their crops as organic.

When certifying organic acres, the buffer zone acreage must be included in the organic acreage.

Producers must also provide a current organic plan, organic certificate or documentation from a certifying agent indicating an organic plan is in effect. Documentation must include:

- name of certified individuals
- address
- telephone number
- effective date of certification
- certificate number
- list of commodities certified
- name and address of certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals \$5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the specific location of each field of certified organic, transitional and buffer zone acreage.

For questions about reporting organic crops, contact your local FSA office. To find your local office, visit <http://offices.usda.gov>.

Just The Right Size

Microloans

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from \$35,000 to \$50,000, on Nov. 7, 2014. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional \$15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA's continued commitment to [small and midsized farming operations](#).

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans. **Important Note:** Microloans cannot be used to purchase real estate.

Since 2010, more than 50 percent of USDA's farm loans now go to beginning farmers and FSA has increased its lending to targeted underserved producers by nearly 50 percent.

Please review the FSA [Microloan Program Fact Sheet](#) for program application, eligibility and related

information.
