County Executive Director:
Sheryl Hunter

Farm Loan Officer:
Dixie Mount

Program Technician:
Alyssa VanAken

County Committee:
Melinda Sims; Montie Munroe;
Michelle Hall, Pat Sheehan,
Ryan Wilson

Next County Committee Meeting: July 8, 2016

The nomination period for the Carbon/Albany FSA County Committee began on June 15, 2016. Nomination forms must be postmarked or received in the Carbon County FSA Office by close of business on Aug. 1, 2016.

County Committees are unique to FSA and allow producers to have a voice on federal farm program implementation at the local level.

To be eligible to serve on the FSA county committee, a person must participated or cooperate in an agency administered program, be eligible to vote in a county committee election and reside in the Local administrative Area (LAA) where they are nominated. All producers, including women, minority and beginning farmers and ranchers are encouraged to participate in the nomination and election process.

This year, nomination and elections will be held in LAA1, which is the Medicine Bow Conservation District service area in Carbon County; and LAA 4, which is all land located north of Township 19 in Albany County.

Producers may nominate themselves or others as candidates. Organizations representing minority and women farmers and ranchers may also nominate candidates. To become a nominee, eligible individuals must sign form FSA-669A. The form and more information about county committee elections is available online at: www.fsa.usda.gov/elections.

Elected county committee members serve a three-year term and are responsible for making decisions on FSA disaster, conservation, commodity and price support programs, as well as other important federal farm program issues. County committees consist of three to eleven members.

FSA will mail election ballots to eligible voters beginning Nov. 7. Ballots are due back in the Carbon/Albany County Office by mail or in person no later than Dec. 5, 2016. All newly elected county committee members and alternates will take office January 1, 2017.

For more information about county committees, please contact the Carbon/Albany County FSA office at 307-326-5657 ext. 2 or visit www.fsa.usda.gov/elections.

Filling a Notice of Loss for Non-Insured Assistance Program (NAP)

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), you must file a CCC-576, Notice of Loss, in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent or 15 calendar days after the normal harvest date.

Producers a Notice of Loss must be filed BEFORE you turn cattle out to graze hay ground that you have decided not to hay this year.

USDA Unveils New Improvement to Streamline Crop Reporting

Farmers and ranchers filing crop acreage reports with the Farm Service Agency (FSA) and participating insurance providers approved by the Risk Management Agency (RMA) now can provide the common information from their acreage reports at one office and the information will be electronically shared with the other location.

This new process is part of the USDA Acreage Crop Reporting Streamlining Initiative (ACRSI). This interagency collaboration also includes participating private crop insurance agents and insurance companies, all working to streamline the information collected from farmers and ranchers who participate in USDA programs.

Once filing at one location, data that's important to both FSA and RMA will be securely and electronically shared with the other location avoiding redundant and duplicative reporting, as well as saving farmers and ranchers times.

Since 2009, USD has been working to streamline the crop reporting process for agricultural producers, who have expressed concerns with providing the same basic common information for multiple locations. In 2013, USDA consolidated the deadlines to 15 dates for submitting these reports, down from the previous 54 dates at RMA and 17 dates for FSA. USDA representatives believe farmers and ranchers will experience a notable improvement in the coming weeks as they approach the peak season for crop reporting later this summer.

More than 93 percent of all annual reported acres to FSA and RMA now are eligible for the common data reporting, and USDA is exploring adding more crops. Producers must still visit both locations to validate and sign acreage reports, complete maps or provide program-specific information. The common data from the first-filed acreage report will now be available to pre-populate and accelerate completion of the second report. Plans are underway at USDA to continue building upon the framework with additional efficiencies at a future date

Farmers and ranchers are also reminded that they can now access their FSA farm information from the convenience of their home computer. Producers can see field boundaries, images of the farm, conservation status, operator and own information and much more.

The new customer self-service portal, known as FSAFarm+, gives farmers and ranchers online access to securely view, print or export their personal farm data. To enroll in the online service, producers are encouraged to contact their local FSA office for details. To find a local FSA office in your area, visit <http://offices.usda.gov>.

Guaranteed Loan Program

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through the lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to \$1,399,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.
